PREFACE

There are a number of Directories available in the market published by different organisations with particular objectives in view. But none of these publications present a State-wise picture of the industrial sector in so far as it pertains to the large and medium sectors with which the Directorate General of Technical Development is mostly concerned.

The non-availability of such a ready reference book giving State-wise information has been felt in the planning circles, State & Central Government levels and by industrialists and others connected with the development of industrial potential in the country.

In view of the current-stress on development of backward regions of the country and the need to plan the growth of ancillaries, the publication of such a Directory of Industrial Units—State-wise and industry-wise was considered essential for focussing attention on the balanced growth of industrial sector.

With these objectives in view the publication division of this organisation has compiled such a Directory, the first of its kind to be brought out by this organisation.

As many as 3,920 units borne on the rolls of this organisation as on 1-10-1973 have been listed in the Directory, State-wise & Industry-wise *i.e.* under each State the units are listed as per First Schedule to Industries Act. Non-scheduled units are given at the end in each State.

Actual location of the unit has been the sole criterion for inclusion of a unit in a particular State/Union Territory.

Wherever information was readily available, we have indicated in the remarks column whether the unit is a registered one or whether it is in the public sector or state sector. We have also indicated industries the further development of which are exclusively reserved for the small scale sector.

Based on the information presented in the body of Directory, we have prepared a statement showing the number of DGTD units (industry-wise) spread over the different States/Union Territories. This statement is given as Appendix II, Appendix I being the First Schedule to Industries'(D & R) Act. This statement reveals many things about development of the industries in the country and points towards the need for development of backward regions of the country on top priority basis.

It is hoped that this publication will be a valuable reference to all concerned. Suggestions for improving the scope and contents of the publication for future editions would be welcome.

Dr. A. SEETHARAMIAH
Director General, Technical Development.
